

PAL®(Portable Audio Laboratory)®

The most delightful radio on the planet.

PAL is the very latest radio from Tivoli Audio. It may be small on size but it is very big on sound. Turn it on and be amazed!

With innovative technology PAL picks up stations with excellent reception and minimal interference. The tuning dial has the same beautifully geared 5:1 tuning dial as the other Tivoli radios allowing easy and accurate tuning. Whilst it offers outstanding mono sound through its internal speaker the PAL has an built-in stereo tuner so listening through headphones provides glorious stereo listening.

The PAL is a neat little number that will fit in the palm of a hand. Its dimensions are 16cm H x 8.7cm W x 9.8cm D and with the optional carry bag, the PAL is easy to transport anywhere. The PAL's rubberised cabinet is also weatherproof, making it perfect for the English summers and for taking on holiday as its technology allows it to work perfectly overseas.

A most innovative feature of the Pal is that it features the latest eco-friendly rechargeable batteries, making buying disposable batteries a thing of the past. A three-hour charge allows up to twenty hours of playback. More than enough for that weekend trip or parties on the beach. Like its bigger mains powered brothers the PAL

also features an input allowing an external device such as a CD, MP3 player or laptop computer to be connected. PAL makes the ideal travelling companion. Can't decide which of the eight funky colours to buy, why not have them all? After all one can never have too many PALs!
