

# iPAL™

Portable Audio Laboratory®

## The iPod's® best PAL.

The iPAL is the perfect compliment to the iPod. Not only does it match the sleek, white and chrome appearance of the popular iPod MP3 player, it also provides hours of cordless playback thanks to the environmentally-friendly rechargeable NiMH battery. The battery has no memory and fully charges in about 3 hours. The iPAL borrows the same geared-down 5:1 ratio tuning dial as used in our critically acclaimed Model One™ AM/FM radio for easy, accurate tuning. There is an auxiliary input to connect an iPod or other device, and a stereo headphone output for private listening, as a recording output, or to use the iPAL as a high-quality outboard tuner. The tuner features Automatic Frequency Control (AFC) which locks on to the center of the station for best reception and lowest distortion. Perhaps most amazing of all is its expansive sound which must be heard to be believed. Doesn't your iPod player deserve the very best?

\*iPod Not Included

- **Playback for iPod/MP3 player**
